

Package: rspat (via r-universe)

August 31, 2024

Type Package
Title rspatial.org data -- terra version
Version 1.0-1
Date 2023-01-02
Depends R (>= 4.0.0), terra
Description Data to support the examples on rspatial.org
License GPL (>=3)
LazyLoad yes
Repository <https://rspatial.r-universe.dev>
RemoteUrl <https://github.com/rspatial/rspat>
RemoteRef HEAD
RemoteSha a423fb341fedad728900bd720efe305008eb16fd

Contents

rspatial-package	1

spat_data	<i>Get example data</i>
-----------	-------------------------

Description

Get and example data set

Usage

```
spat_data(name)
spat_download(files, path="data", url="https://biogeo.ucdavis.edu/data/rspatial/")
```

Arguments

name	data set name
files	filenames to download
path	path (folder) to save the data to
url	url where the data is downloaded from

Value

A data set. Often a Spatial* object or a data.frame

Examples

```
auctb <- spat_data("auctb")
crime <- spat_data("crime")
```
